## Transformers for switching power supplies

Pin terminal type

## ECO2425SEO-D05V014

## ■ FEATURES

ODownsized yet compliant with worldwide safety standards.
OSupports automatic winding
OConsiderably reduced characteristic variations.

## - APPLICATION

Olsolation type Single-output power supplies
Olnput : 90 to 264Vac
O1Output: 24V/1.0A
OCircuit type : PWM flyback
Ofrequency: 100kHz

## - REFERENCE TEST BOARD

OTEST BOARD ECO30W-24 (TDK)

■ WINDING SPECIFICATIONS

| No. | Coil | Terminal | Turns | Wire | Rdc(m $\Omega)^{* 1}$ | Note*2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | NP1 | $2-5$ | 20 | UEW 0.37 | 133 | Clock wise (NP1 + NP2 = 57Ts) |
| 2 | NS1 | $8-11$ | 20 | UEW $0.32 \times 2$ | 95.7 | Clock wise |
| 3 | NP2 | $5-6$ | 37 | UEW 0.37 | 305 | Clock wise |
| 4 | NB | $3-4$ | 13 | UEW 0.23 | 309 | Clock wise |
| 5 |  |  |  |  |  |  |
| 6 |  |  |  |  |  |  |
| 7 |  |  |  |  |  |  |
| 8 |  |  |  |  |  |  |
| 9 |  |  |  |  |  |  |
| 10 |  |  |  |  |  |  |

${ }^{* 1}$ Rdc value is a reference.
*2 Clockwise direction is an order direction when see a transformer from the upper part.

## ECO2425SEO-D05V014

## ■RELIABILITY TESTS

| Item | Standards | Test methods |
| :---: | :---: | :---: |
| Vibration resistance | Standard of inductance, insulation resistance, withstand voltage must be satisfied. | Sweep 1.5 mm amplitude and $10-$ to- $55-\mathrm{to}-10 \mathrm{~Hz}$ in 1 min in $\mathrm{X}, \mathrm{Y}$, and $Z$ directions for 2 h respectively. |
| Heat resistance |  | Measure in normal temperature after leaving in $100 \pm 2^{\circ} \mathrm{C}$ for 96 h . |
| Cold resistance |  | Measure in normal temperature after leaving in $-40 \pm 2^{\circ} \mathrm{C}$ for 96 h . |
| Humidity resistance |  | Measure in normal temperature after leaving in $60 \pm 2^{\circ} \mathrm{C}$ and 90 to $95(\%)$ RH for 96 h . |
| Temperature cycle |  | One cycle is $-25^{\circ} \mathrm{C}$ for 30 min , normal temperature for 30 min , and $85^{\circ} \mathrm{C}$ for 30 min ; measure after 10 cycles of the test have been performed. |
| Terminal strength | 9.8 N min. | Apply 9.8 N load in the direction of terminal axis for $30 \pm 5 \mathrm{~s}$. Any terminal must not be pulled out or chatter. |
| Solderability | Solder covers more than $90 \%$. | Dip in solder with the temperature of $245 \pm 2^{\circ} \mathrm{C}$ for $3 \pm 0.5 \mathrm{~s}$. |

## NOTE

$\square$ Operation Range after the assembly
Temperature : $-25^{\circ} \mathrm{C}$ to $+115^{\circ} \mathrm{C}$
(Including self temperature rise.)
Humidity : 10 to $95 \%$ RH
(Maximum wet-bulb temperature is $38^{\circ} \mathrm{C}$, without dewing)

Storage Range after the assembly
Temperature : $-25^{\circ} \mathrm{C}$ to $+80^{\circ} \mathrm{C}$
Humidity : 10 to $95 \%$ RH
(Maximum wet-bulb temperature is $38^{\circ} \mathrm{C}$, without dewing)

## $\square$ Applicable Safety Standard

IEC600335-1, IEC61558-1 (Basic Insulation)
Electrical Appliance and Material Safety Act /Japan (Basic Insulation)
IEC62368-1 (Reinforced Insulation)
*Working voltage $\leqq 300 \mathrm{Vrms}$, Pollution degree 2
*Product is not approved to the above standard. But construction and materials are designed in accordance with safety considerations.

## ECO2425SEO-D05V014

■INPUT / OUTPUT OVERVIEW

| Description |  | Symbol | Min. | Typ. | Max. | Unit | Condition |

## ECO2425SEO-D05V014

## ■REFERENCE WAVEFORM

## ECO2425SEO-D05V014

■REFERENCE SCHEMATIC DIAGRAM

## An attention matter on use

Please read this specifications before using this product by all means.

## An attention matter on security

I undertake use with this product, and it is paid attention enough, and please design an attention matter safely.

## $\triangle$ Attention on a design

When you designs a base of an electric circuit.
Please use size of the hole or pad which we recommend.
Magnetic flux to leak out occurs. Please confirm it about influence of magnetic flux beforehand.
There is fear to cause false movement of machinery.
In a design of a base of an electric circuit, Please consider the next contents.
In an applied safe standard.
The trans and distance with other parts
The product is not quakeproof structure.
Accordingly please do not add vibration and a shock to it.
There is fear to lose a function.

## $\triangle$ Attention on the handling

Please do not use it when you let a product drop.
The product produces possibility to lose a function
Please pay attention to the pin which had it pointed keenly.
There is danger to injure.
Please avoid the next place. The place that receives a drop of water, trash, the dust, foggy influence. The place where direct rays of the sun hits. There is fear to cause false movement of machinery.
Please prohibit safekeeping and use at the next place. Environment to be accompanied with gas corrosion, salt, acid, alkali. There is fear to lose a function.
When you carry the product on a base of an electric circuit.
Please do not use a metal tool. Because impossible power is added to a product.
There is fear to lose a function.
$\square$

## Attention

I considered the next matter, and we designed a product.
Safe standard and power supply voltage and circuit drive condition, drive frequency and Duty ON-TIME.
By those conditions, we decided structure and the turns number.
Please avoid use in designed condition outside.
There are destruction of a circuit part and fear of ignition.
This product considered a characteristic of a component and a self temperature rise, and it was made.
We select range of humidity as use temperature already.
Please avoid use by range more than this.
There are the damage and fear of ignition.
Please avoid use in the environment next.
The environment that trash and the dust stick to a product. There is fear to cause a fire.
The products listed on this specification sheet are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition.
The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property.
If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions set forth in this catalog, please contact us.
(1) Aerospace/Aviation equipment
(2)Transportation equipment (cars, electric trains, ships, etc.)
(3) Medical equipment
(4) Power-generation control equipment
(5) Atomic energy-related equipment
(6) Seabed equipmentapplications
(7) Transportation control equipment
(8) Public information-processing equipment
(9) Military equipment
(10) Electric heating apparatus, burning equipment
(11) Disaster prevention/crime prevention equipment
(12) Safety equipment
(13) Other applications that are not considered general-purpose applications

When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing protection circuit/device or providing backup circuits in your equipment.

[^0]:    *1 Measurement Condition: 100kHz, 1V
    *2 Measurement Condition : Sense $1.0 \mathrm{~mA}, \mathrm{f}=50$ or 60 Hz
