

Universal WorkBench™ 1007 Bases and Covers

Spend less time figuring out how to mount components and more time connecting and programming.

“The WorkBench is just what I need for the project I am building. It’s a well thought out, amazing product.”

— THOMAS N., ENTREPRENEUR & MAKER

Less Frustration. More Innovation.

You bring the electronics. The Universal WorkBench is everything else needed to make your project look amazing and professional. It empowers you to transition ideas easily from prototyping all the way to field-hardened, hazardous environment deployments using the same standard interface.

1007 BASE

Use to prototype, manage electronics, and transport your projects.

- Hang by handle for easy temporary storage
- Holes on legs enable more permanent mount, if desired
- Choice of four colors (gloss black, matte black, sapphire blue, neon green)

1007 COVER

Protects and makes projects easily and safely portable.

- Ample space for wire or cord through-access
- Ventilation to prevent electronics over-heating
- Holes on sides align with Base; bolt Cover to Base for extra security

WorkBench 1007 Product Specifications

Item	Dimensions	Material
1007 Base	14" x 8" x 1" overall (approx.) 54 sq. in. work surface 10x7 primary matrix; 9x6 secondary matrix	3mm acrylic sheet Choice of gloss black, matte black, sapphire, neon green
1007 Cover	10" x 8" x 3.5"; Approx. 2.5" clearance between Base and Cover when attached	3/32" clear gloss acrylic sheet

Electronics Mounting Guide

No matter what electronic component you use, there is a way to mount it on the Universal WorkBench. Download the Electronics Mounting Guide eBook at <https://www.phasedock.com/electronics-mounting-guide>
