

Launchpad Breakout Board for micro:bit and Adafruit CLUE – by Mission Control Lab  
Product ID: 4765

This TIE Fighter–lookalike PCB, named [Launchpad](#), is a specially–made add–on board that breaks out all the pins on your [micro:bit](#) and [CLUE](#) so you can creatively, collaboratively connect your project's circuits with [conductive materials](#) on almost anything, nearly anywhere!

The breakout sits flat so it's good for use on rigid surfaces with [conductive paint](#), or with [conductive nylon](#), or with just [plain alligator clips](#). The iridescent sparkly packaging includes a special QR code to access more information and documentation.

**Does NOT** include neither a [micro:bit](#) nor an [Adafruit CLUE](#). Will work with any/all ":bit" shaped boards.
