Micro-acoustic extractor
GNSS L1

Part number: B8939

Ordering code: B39162B8939L210

Date: August 25, 2022

Version: 2.4

DCN: 80-PA243-482 Rev. E

1   Application

■ Premium-performance GNSS L1 Extractor with single ended 50 Ω ports
■ Ultra-low-loss acoustic structure
■ Advanced fully-integrated multiplexer structure
■ Using common antenna for GNSS L1 and Cellular bands
■ Placed between antenna and cellular front-end switches and filters
■ Usable GNSS L1 pass bands: 1559.05-1563.144 MHz (BeiDou), 1574.42-1576.42 MHz (GPS), 1597.55-1605.89 MHz (Glonass)
■ Usable CELL pass bands: 617-1511 MHz, 1695-2690 MHz, 3300-5000 MHz
■ No switches and control lines required

2   Features

■ Package size 1.5 mm × 1.1 mm
■ Package height 0.6 mm
■ Approximate weight 3 mg
■ RoHS compatible
■ Package for Surface Mount Technology (SMT)
■ Ni/Au-plated terminals
■ Electrostatic Sensitive Device (ESD)
■ Moisture Sensitivity Level 3 (MSL3)

16 Marking

Products are marked with product type number and lot number encoded according to Table 2:

■ Type number:

The 4 digit type number of the ordering code,   e.g., B3xxxxB**1234**xxxx,
is encoded by a special BASE32 code into a 3 digit marking.

Example of decoding   type number marking on device   in decimal code.
   16J   **=>**   **1234**
   $1 \times 32^2 + 6 \times 32^1 + 18 \, (=J) \times 32^0$ **=**   **1234**
The BASE32 code for product type B8939 is 8QB.

■ Lot number:

The last 5 digits of the lot number,   e.g.,   **12345**,
are encoded based on a special BASE47 code into a 3 digit marking.

Example of decoding lot number marking on device   in decimal code.
   5UY   **=>**   **12345**
   $5 \times 47^2 + 27 \, (=U) \times 47^1 + 31 \, (=Y) \times 47^0$ **=**   **12345**

18 Annotations

18.1 RoHS compatibility

ROHS-compatible means that products are compatible with the requirements according to Art. 4 (substance restrictions) of Directive 2011/65/EU of the European Parliament and of the Council of June 8th, 2011, on the restriction of the use of certain hazardous substances in electrical and electronic equipment ("Directive") with due regard to the application of exemptions as per Annex III of the Directive in certain cases.

18.2 Scattering parameters (S-parameters)

The pin/port assignment is available in the headers of the S-parameter files. Please contact your local RF360 sales office.

18.3 Ordering codes, product IDs, labels, and packing units

Ordering code	Product ID	RF360 label	Packing unit
B39162B8939L210	B39162-B8939-L210-S05	B39162B8939L210S 5	5000 pcs
	B39162-B8939-L210-W05	B39162B8939L210W 5	5000 pcs

Table 4: Ordering codes / product IDs and packing units. Shipment will come from either Singapore or Wuxi location.

19 Cautions and warnings

19.1 Display of ordering codes for RF360 products

The ordering code for one and the same product can be represented differently in data sheets, data books, other publications and the website of RF360, or in order-related documents such as shipping notes, order confirmations and product labels. The varying representations of the ordering codes are due to different processes employed and do not affect the specifications of the respective products. Detailed information can be found on the Internet under https://rffe.qualcomm.com/.

19.2 Material information

Due to technical requirements components may contain dangerous substances. For information on the type in question please also contact one of our sales offices.

For information on recycling of tapes and reels please contact one of our sales offices.

19.3 Moldability

Before using in overmolding environment, please contact your local RF360 sales office.

19.4 Package information

Landing area

The printed circuit board (PCB) land pattern (landing area) shown is based on RF360 internal development and empirical data and illustrated for example purposes, only. As customers' SMD assembly processes may have a plenty of variants and influence factors which are not under control or knowledge of RF360, additional careful process development on customer side is necessary and strongly recommended in order to achieve best soldering results tailored to the particular customer needs.

Dimensions

Unless otherwise specified all dimensions are understood using unit millimeter (mm).

Projection method

Unless otherwise specified first-angle projection is applied.

Europe GmbH

20 Important notes

The following applies to all products named in this publication:

1. Some parts of this publication contain **statements about the suitability of our products for certain areas of application**. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out **that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application.** As a rule, RF360 Europe GmbH and its affiliates are either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether an RF360 product with the properties described in the product specification is suitable for use in a particular customer application.

2. We also point out that **in individual cases, a malfunction of electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified.** In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of an electronic component could endanger human life or health (e.g. in accident prevention or life-saving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of an electronic component.

3. **The warnings, cautions and product-specific notes must be observed.**

4. In order to satisfy certain technical requirements, **some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as hazardous)**. Useful information on this will be found in our Material Data Sheets on the Internet (https://rffe.qualcomm.com). Should you have any more detailed questions, please contact our sales offices.

5. We constantly strive to improve our products. Consequently, **the products described in this publication may change from time to time**. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order. We also **reserve the right to discontinue production and delivery of products**. Consequently, we cannot guarantee that all products named in this publication will always be available.
The aforementioned does not apply in the case of individual agreements deviating from the foregoing for customer-specific products.
