## (1) seeed

# Grove - AHT2O I2C Industrial Grade Temperature and Humidity Sensor 

SKU 101990644
Grove AHT20 Temperature and Humidity sensor is an industrialgrade sensor based on AHT20.

## Note

The color of the arrival PCB is blue!!! The Grove interface has already been soldered on the PCB.

## Key Features

Temperature measurement range $-40 \sim 85^{\circ} \mathrm{C}$, Humidity measurement range 0 ~ 100\% RH

Digital output, Grove I2C interface
Excellent long-term stability
SMD package suitable for reflow soldering
Quick response and strong anti-interference ability
Compatible with Arduino
4-pin interface reserved

## Description

Grove AHT20 Temperature and Humidity sensor is based on AHT20, compared with Grove - Temperature \& Humidity Sensor Pro (AM2302/DHT22), AHT20 is a new generation of temperature and humidity sensor embedded with a dual-row flat and no-lead SMD package, suitable for the reflow soldering. AHT20 is equipped with a newly designed ASIC chip: an improved MEMS semiconductor capacitive humidity sensor, and a standard on-chip temperature sensor. The output is I2C protocol with the Grove interface.

The performance of AHT20 is more stable in harsh environments compared with the previous generation of temperature and humidity sensor, as a matter of fact, AHT20 is fittable in most industrial scenarios.

## Dimensions

24x20x12(mm)

## What is Grove?

Grove makes it easier to connect, experiment, and simplify the prototyping process. No jumpers or soldering required. We have developed more than 300 Grove modules, covering a wide range of applications that can fulfill a variety of needs. Not only are these open hardware, but we also have open-source software.
