

IS31AP2031 CLASS-K AUDIO POWER AMPLIFIER EVALUATION BOARD GUIDE

DESCRIPTION

The IS31AP2031 is a Class-K audio power amplifier with automatic gain control. It drives up to 2.0W (10% THD+N) into an 8Ω speaker from a 4.2V VCC supply. The IS31AP2031 provides low cost, space saving solution for portable equipments which need audio output with higher power by boosting up supply voltage. Its external components just include a few capacitors and resistors (no inductor). The IS31AP2031 use fully differential design to reduce RF noise. The IS31AP2031 integrates de-pop circuitry to reduce pop and click noise during power on/off or shutdown enable operation. The IS31AP2031 also integrates thermal and short circuit protection function.

FEATURES

- Operates from 2.7V to 4.5V
- 2.0W into an 8Ω load from a 4.2V supply (10% THD+N)
- 4 gain levels: 12dB, 16dB, 24dB, 27.5dB
- AGC function
- Pulse Count Control serial interface
- 8kV HBM ESD
- Thermal and short-circuit protection
- Available in QFN-20 (3mm × 3mm).

QUICK START

Figure 1: Photo of IS31AP2031 Evaluation Board

RECOMMENDED EQUIPMENT

- ≤ 4.5V, 2A power supply
- Audio source (i.e. MP3 player, Notebook PC, etc.)
- An 8Ω speaker

ABSOLUTE MAXIMUM RATINGS

- ≤ 4.5V power supply

Caution: Do not exceed the conditions listed above; otherwise the board will be damaged

PROCEDURE

The IS31AP2031 demo board is fully assembled and tested. Follow the steps listed below to verify board operation.

Caution: Do not turn on the power supply until all connections are completed.

- 1) Connect an 8Ω (or larger) speaker across the OUT- terminal and OUT+ terminal.
- 2) Connect the ground terminal of the power supply to the GND and the positive terminal to the VCC. Or connect DC power to connector (DC IN).
- 3) If the audio source is differential, remove jumper JP1, connect the negative of the audio source to the IN- terminal, and connect the positive of the audio source to IN+ terminal.
- 4) If the audio source is single-ended, connect the audio source to the IN- terminal, and close jumper JP1; or connect audio source to the audio connector (AUDIO IN) and close jumper JP1.
- 5) Turn on the power supply, and pay attention to the supply current. If the current exceeds 1.5A, please check for circuit fault.
- 6) Turn on the audio source.

ORDERING INFORMATION

Part No.	Temperature Range	Package
IS31AP2031-QFLS2-EB	-40°C to +85°C (Industrial)	QFN-20, Lead-free

For pricing, delivery, and ordering information, please contacts ISSI's analog marketing team at analog@issi.com or (408) 969-660.

IS31AP2031 CLASS-K AUDIO POWER AMPLIFIER EVALUATION BOARD GUIDE

PERFORMANCE DESCRIPTION

The IS31AP2031 evaluation board has four buttons to switch between the different modes. The operating mode is indicated by an LED illuminated above the appropriate buttons. The modes listed as below:

- 1) Mode1: gain level 12dB AGC OFF.
- 2) Mode2: gain level 16dB AGC ON.
- 3) Mode3: gain level 24dB AGC OFF.
- 4) Mode4: gain level 27.5dB: AGC ON.
- 5) Shutdown mode: close Jumper (JP2) enter shutdown mode.

Note: IS31AP2031 Audio Amplifier provides solely the Audio function on the evaluation board.

SOFTWARE SUPPORT

Please refer to the integrated program.

Note: The Jumper JP3 is closed by default, if the JP3 is open, the MCU will stop functioning, the SDB pin of the chip in a high impedance state. The external MCU can be used to control the board SD (TP7) point.

Please refer to the datasheet to get more information about IS31AP2031.
