Enclosure Bezel for OLED 1602 LCD Display 16 X 2 Screen Module (2 Pack)

Get ready to elevate the look and feel of your project with our Enclosure Bezel for the 1602 OLED LCD Display! Designed and made in the USA, this bezel is your solution to mounting challenges and ensures a neat and tidy installation process.

Designed with a special focus on aesthetics and functionality, this bezel will fit the popular 1602 LCD display module (16 x 2 screen). It will not only cover any rough or jagged edges resulting from the hole cutting in your project case but will also provide a refined finish to your setup.

The rear side of the bezel is specially configured to hold the display firmly in position. It can be easily secured using silicone or a similar adhesive, guaranteeing a snug fit without the fear of your display dislodging.

Please note that this listing is solely for the bezel - the LED display and enclosure shown in the images are for reference purposes only. The package will contain two (2) bezels.
Be mindful that you are required to size and cut a hole in your chosen enclosure to accommodate this bezel. With the images showing exact measurements, you can make sure this bezel is the perfect fit for your project.

Sporting a sleek black color, this bezel is sturdy. Made proudly in the USA, the quality of our bezel reflects our commitment to deliver the best to our customers.
And the best part? We offer an impressively quick lead time of just 1 business day! So why wait? Order your Arduino Enclosure Bezel today and give your project the quality touch it deserves!
