## ALL-IN-ECO REMOVER

Elba ALL -IN-ECO Remover is a safe way to clean or etch concrete, plaster or mortar surfaces and concrete and clay masonry. It is ideal for the removal of efflorescence (whitening on concrete).

It is also ideal for removing unwanted concrete spills, residue and buildup from a variety of surfaces.

### Benefits

- Non-toxic, non-flammable, non-corrosive and non-hazardous when used as directed.
- Removes encrusted lime scale, rust and corrosion from water-wetted surfaces.
- Removes cement and concrete from trucks, building forms, concrete mixers, pumps, tools and all sorts of construction equipment.
- Removes barnacles and mussels from propellers, skegs, rudders, boat hulls, pipe.
- Lowers maintenance and operating costs, improves equipment surface appearance.
- Does not harm most paints and metals including brass and copper.
- Improves thermal efficiency by improving heat transfer coefficient.
- Concrete Remove and Cement Dissolver.
- Biodegradable will not harm grass or vegetation.
- Best for DIY project cleanup!

### Application

- Removes cement and concrete from trucks, building forms, concrete mixers, pumps and all sorts of construction equipment
- Cleans excess mortar from bricks, tile and concrete blocks.
- Removes barnacles and mussels from propellers, skegs, rudders, boat hulls, pipe, screens, pumps and exchangers in power plants.
- Removes rust and stains from floors and process equipment.

### Physical Properties

Appearance :	Clear Yellow
Specific Gravity @60 C:	1.039
Boiling Point:	214 F (101 C)
Freeze Point:	-22 F (30 C)
Flash Point:	None
Temperature of Reaction:	Negligible
Odor:	Pleasant
