#### **2. Reasons/Background:**

Antenna Substrate of the current products is FPC (Flexible printed circuits).  
However, the demand for RFID products at FPC market are sluggish.  
There might be concerns about stable supply and price increase in future.  
For this reason, we change Antenna substrate from FPC to PCB.  
The alternative is readable by smartphones although it is different from the current product in terms of size, packaging style, and read range.
