

CDKW04 W About Item

1. **Four unique charging modes:** 15W, 10W, 7.5W & 5W charging modes that support a wide range of smartphones available in the market with wireless charging capability. The charger automatically recognizes the optimum device charge speed and sets the charge accordingly.
2. **Unique Design Perfect for AirPods:** The wireless charging pad is designed uniquely to fit AirPods with a wireless charging case. The charging area is the perfect size for AirPods, making it the ideal wireless charging accessory. The wireless charger holds your AirPods firmly in place and prevents them from slipping.
3. **Safer and Easier to USE:** For added safety and convenience, the wireless charger uses multifunctional intelligent protection technology, which ensures temperature control, surge protection, and short-circuit prevention. Additionally, it is made of ABS material that is fire-resistant and has a UL certificate, assuring buyers. With a dual guarantee and double safety, you can enjoy a secure charging experience. To optimize your experience, please remove your phone case before charging.
4. **More User-friendly Design:** The wireless charging station has a sleep-friendly design. When you connect it to a power source, the LED indicator flashes for three seconds and then turns on for sixteen seconds to indicate that your phone is charging correctly. The light then turns off to ensure a sleep-friendly charging process.
5. **Upgraded Non-slip Design:** The charger station is designed to prevent slipping, with non-slip silicone material embedded on the top and bottom of the charger. This feature ensures that it stays in place on smooth desktop surfaces. The 5 Core wireless charging station can also charge phones with a general plastic or silicone case less than 4mm thick. However, charging may not be possible with magnetic and metal attachments or cards.

Product Description

Are you tired of dealing with messy cables and tangled wires every time you need to charge your device? Say goodbye to that headache with our state-of-the-art wireless charger! The 5 Core wireless charger is the perfect companion for your AirPods and any Qi-enabled smartphones.

Q&A

Question: What devices are compatible with this wireless charger?

Answer: The 5 Core wireless charger is compatible with a variety of devices, including Airpods & Qi-enabled smartphones.

Question: Can I charge my phone with the case on?

Answer: Yes, you can charge your phone with a case on, as long as the case is less than 4mm thick and has no metal card in between.

Question: How long does it take to fully charge a device?

Answer: The charging time will depend on the device being charged and its battery capacity. However, our wireless charger features high-efficiency charging that saves time.

Question: Is it safe to charge my device overnight?

Answer: Yes, the 5 Core charging pad features exclusive safety features like surge protection and temperature control to prevent overcharging and overheating.

Question: Can I use my phone while charging on the wireless charger?

Answer: Yes, you can use your phone while it's charging on the wireless charger. However, it's recommended to keep the phone still and avoid moving it around to ensure proper charging.
