

Product End of Life Notification

Dear valued customer,

In early 2024, Excelitas will be closing its Shenzhen (China) facility after 28 years. The Shenzhen facility produces Xenon flashlamp products, primarily supporting warning beacon, professional photography, and road traffic monitoring applications. Due to declining demand, Excelitas is permanently ending production of all products, effective immediately.

At this moment, Excelitas expects to be able to honor all current open orders for Shenzhen products. Xenon Flashlamps built in other Excelitas facilities, such as Batam (Indonesia) will continue in production.'

If there are any questions about the status of any product, either included or not, please reach out to your commercial contacts below
