SOLDERED

SMART LED WS2812B RING24

Weight	9 g
Description	

DESCRIPTION

WS2812B is an extremely interesting LED that can emit light in red, green or blue - or any combination of these three colors, able to show a total of approximately 16 million different colors. On this board diodes are arranged in a circle. They are controlled by a single pin with only few lines of code from Arduino IDE. That's possible thanks to the integrated controller inside the LED itself!

FEATURES

- Number of LEDs: 24
- Voltage: 5V
- LED type: WS2812B
- Current: 18mA per LED
- Circle outer diameter: 67 mm / 2.6 inch
