Advanced Digital Temperature Controller

E5AN-H/E5EN-H

(96 x 96 mm and 48 x 96 mm)

CSM_E5AN-H_E5EN-H_DS_E_3_14

A New High-performance Controller: High Resolution, High Speed, and High Input Accuracy.

Logic Operations and Preventive Maintenance Function.

- High-resolution display with 5 digits/0.01°C display.
- High-speed sampling cycle of 60 ms.
- High Accuracy

Thermocouple/Pt input: ±0.1% of PV

Analog input: ±0.1% FS

- Universal inputs on all models (thermocouple, PT, or analog input) to handle various sensors with one Controller. Models also available with Remote SP.
- A PV/SV-status display function can be set to automatically alternate between displaying the status of the Temperature Controller (auto/manual, RUN/STOP, and alarms) and the PV or SV.
- Flexible contact outputs with logic operations (AND, OR, and delays) set from the Support Software (CX-Thermo Ver. 4.0)
- Preventive maintenance for relays in the Temperature Controller using a Control Output ON/OFF Counter.
- Model available with position-proportional control

↑ Refer to Safety Precautions for E5_N/E5_N-H.

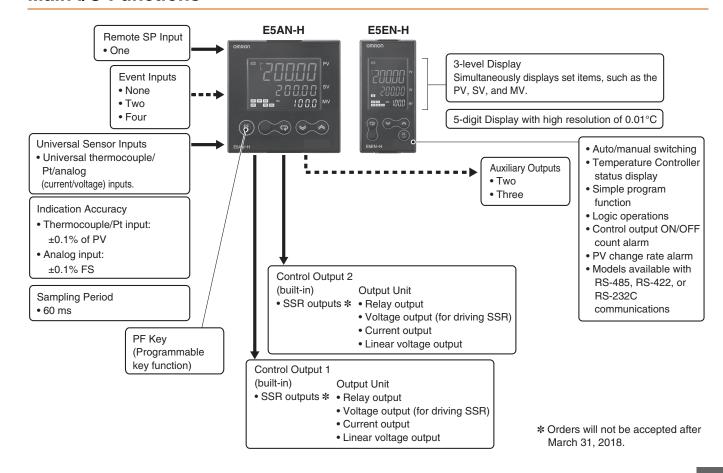

Refer to *Operation for E5_N/E5_N-H* for operating procedures.

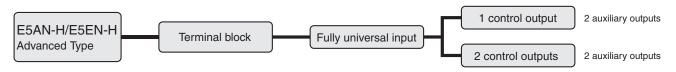

For the most recent information on models that have been certified fo safety standards, refer to your OMRON website.

E5AN-HSS□-500, E5EN-HSS□-500 in this catalog have been discontinued at the end of March 2018.

Main I/O Functions

Lineup

Note: The Controller can be used for heating/cooling control even if only 1 control output is used.

Model Number Structure

Model Number Legend

Controllers

1 2 3 4 5 6 7 8 9 10

1. Type

H: Advanced

2. Control Mode

Blank: Standard or heating/cooling control

P: Position-proportional control

3. Control Output 1

A: Control Output Unit

R: Relay output

S: SSR output *

4. Control Output 2

A: Control Output Unit

R: Relay output

S: SSR output *

5. Auxiliary Outputs

2: Two outputs

3: Three outputs

6. Option 1

Blank: None

H: Heater burnout/SSR failure/Heater overcurrent detection (CT1)

HH: Heater burnout/SSR failure/Heater overcurrent detection

7. Option 2

B: Two event inputs

BF: Event input + Transfer output

8. Option 3

M: Option Unit can be mounted.

9. Power Supply Voltage

Blank: 100 to 240 VAC

D: 24 VAC/VDC

10.Case Color

Blank: Black

W: Silver

11.Terminal Cover

-500: With Terminal Cover

* Orders will not be accepted after March 31, 2018.

Option Units

1. Function

EN01: RS-232C communications

EN02: RS-422 communications

EN03: RS-485 communications

AKB: Event input

Output Units

E53-

1. Control Output

R: Relay output

Q: Voltage output (for driving SSR)

Q3: Voltage output (for driving SSR) + 24 VDC (NPN)

Q4: Voltage output (for driving SSR) + 24 VDC (PNP)

C3: Current output + 4 to 20 mA DC

C3D: Current output + 0 to 20 mA DC

V34: Linear voltage output + 0 to 10 VDC

V35: Linear voltage output + 0 to 5 VDC

2. Version

Blank: Available for E5AN-E5EN-H.

N: Available only for E5AN-H/E5EN-H.

This data sheet is provided as a guideline for selecting products. Be sure to refer to the following user manuals for application precautions and other information required for operation before attempting to use the product.

E5CN-H/E5AN-H/E5EN-H Digital Controllers User's Manual Advanced Type (Cat. No. H157)

E5CN-H/E5AN-H/E5EN-H Digital Controllers Communications Manual Advanced Type (Cat. No. H159)

Shaded settings are the default settings.

The applicable standards for the input types are as follows:

K, J, T, E, N, R, S, B: JIS C 1602-1995, IEC 584-1

L: Fe-CuNi, DIN 43710-1985

U: Cu-CuNi, DIN 43710-1985

W: W5Re/W26Re, ASTM E988-1990

JPt100: JIS C 1604-1989, JIS C 1606-1989

Pt100: JIS C 1604-1997, IEC 751

PL II: According to Platinel II electromotive force charts from BASF (previously Engelhard)

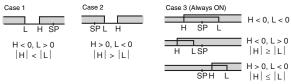

Alarm Outputs

Each alarm can be independently set to one of the following 13 alarm types. The default is 2: Upper limit. Auxiliary outputs are allocated for alarms. ON delays and OFF delays (0 to 999 s) can also be specified.

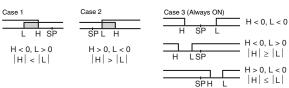

Note: For models with heater burnout, SSR failure, and heater overcurrent detection, alarm 1 will be an OR output of the alarm selected from the following alarm types and the alarms for heater burnout, SSR failure, and heater overcurrent. To output only a heater burnout alarm, SSR failure alarm, and heater overcurrent alarm for alarm 1, set the alarm type to 0 (i.e., no alarm function).

| | | Alarm outpo | ut operation | | | | | | |
|-----------|--|--------------------------------|--------------------------------|---|--|--|--|--|--|
| Set value | Alarm type | When alarm value X is positive | When alarm value X is negative | Description of function | | | | | |
| 0 | Alarm function OFF | Output OFF | | No alarm | | | | | |
| 1 | Upper- and lower-limit *1 | ON L H SP | *2 | Set the deviation in the set point by setting the alarm upper limit (H) and alarm lower limit (L). | | | | | |
| 2 | Upper-limit | ON X SP | ON X SP | Set the upward deviation in the set point by setting the alarm value (X). | | | | | |
| 3 | Lower-limit | ON X SP | ON X SP | Set the downward deviation in the set point by setting the alarm value (X). | | | | | |
| 4 | Upper- and lower-limit range *1 | ON L H SP | *3 | Set the deviation in the set point by setting the alarm upper limit (H) and alarm lower limit (L). | | | | | |
| 5 | Upper- and lower-limit with standby sequence *1 | ON OFF SP | *4 | A standby sequence is added to the upper- and lower-limit alarm (1). *7 | | | | | |
| 6 | Upper-limit with standby sequence | ON X SP | ON X - SP | A standby sequence is added to the upper-limit alarm (2). *7 | | | | | |
| 7 | Lower-limit with standby sequence | ON OFF SP | ON X SP | A standby sequence is added to the lower-limit alarm (3). *7 | | | | | |
| 8 | Absolute-value upper-limit | ON OFF 0 | ON OFF 0 | The alarm will turn ON if the process value is larger than the alarm value (X) regardless of the set point. | | | | | |
| 9 | Absolute-value lower-limit | ON ←X→ OFF 0 | ON OFF | The alarm will turn ON if the process value is smaller than the alarm value (X) regardless of the set point. | | | | | |
| 10 | Absolute-value upper-limit with standby sequence | ON OFF 0 | ON OFF 0 | A standby sequence is added to the absolute-value upper-limit alarm (8). *7 | | | | | |
| 11 | Absolute-value lower-limit with standby sequence | ON ←X→ OFF 0 | ON OFF 0 | A standby sequence is added to the absolute-value lower-limit alarm (9). *7 | | | | | |
| 12 | LBA (alarm 1 type only) | - | | *8 | | | | | |
| 13 | PV change rate alarm | | | *9 | | | | | |
| 14 | RSP absolute value upper limit *6 | ON OFF 0 | ON ←X→ O | The alarm turns ON when the remote SP (RSP) is larger than the alarm value (X). This alarm functions in both Local SP and Remote SP Modes. | | | | | |
| 15 | RSP absolute value lower limit *6 | ON OFF 0 | ON OFF 0 | The alarm turns ON when the remote SP (RSP) is smaller than the alarm value (X). This alarm functions in both Local SP and Remote SP Modes. | | | | | |

- *1. With set values 1, 4 and 5, the upper and lower limit values can be set independently for each alarm type, and are expressed as "L" and "H."
- *2. Set value: 1, Upper- and lower-limit alarm

*3. Set value: 4, Upper- and lower-limit range

- ***4.** Set value: 5, Upper- and lower-limit with standby sequence For Upper- and Lower-Limit Alarm Described Above
 - Case 1 and 2
 <u>Always OFF</u> when the upper-limit and lower-limit hysteresis overlaps.
 - Case 3: Always OFF

- *5. Set value: 5, Upper- and lower-limit with standby sequence <u>Always OFF</u> when the upper-limit and lower-limit hysteresis overlaps.
- ***6.** Displayed when there is a remote SP input.
- *7. Refer to the E5CN/E5AN/E5EN/E5GN Digital Temperature Controllers User's Manual Basic Type (Cat. No. H156) for information on the operation of the standby sequence.
- *8. Refer to the E5CN/E5AN/E5EN/E5GN Digital Temperature Controllers User's Manual Basic Type (Cat. No. H156) for information on the loop burnout alarm (LBA).
- *9. Refer to the E5CN/E5AN/E5EN/E5GN Digital Temperature Controllers User's Manual Basic Type (Cat. No. H156) for information on the PV change rate alarm.

| Applicable OS | Windows XP/Vista/7/8/8.1/10 |
|-------------------------------|---|
| Applicable software | CX-Thermo version 4 or higher |
| Applicable models | E5AN/E5EN/E5CN/E5CN-U/ E5AN-H/E5EN-H/E5CN-H |
| USB interface standard | Conforms to USB Specification 1.1. |
| DTE speed | 38400 bps |
| Connector specifications | Computer: USB (type A plug) Temperature Controller: Setup Tool port (on bottom of Controller) |
| Power supply | Bus power (Supplied from USB host controller.) |
| Power supply voltage | 5 VDC |
| Current consumption | 70 mA |
| Ambient operating temperature | 0 to 55°C (with no condensation or icing) |
| Ambient operating humidity | 10% to 80% |
| Storage temperature | -20 to 60°C (with no condensation or icing) |
| Storage humidity | 10% to 80% |
| Altitude | 2,000 m max. |
| Weight | Approx. 100 g |

Note: A driver must be installed in the personal computer. Refer to installation information in the operation manual for the Conversion Cable.

Communications Specifications

| Transmission line connection method | RS-485, RS-422: Multipoint RS-232C: Point-to-point |
|-------------------------------------|---|
| Communications | RS-485 (two-wire, half duplex) RS-422 (four-wire, half duplex) or RS-232C |
| Synchronization method | Start-stop synchronization |
| Protocol | CompoWay/F, SYSWAY, or Modbus |
| Baud rate | 1200, 2400, 4800, 9600, 19200, 38400, or 57600 bps |
| Transmission code | ASCII (CompoWay/F, SYSWAY) RTU (Modbus) |
| Data bit length * | 7 or 8 bits |
| Stop bit length * | 1 or 2 bits |
| Error detection | Vertical parity (none, even, odd) Frame check sequence (FCS) with SYSWAY Block check character (BCC) with CompoWay/F or CRC-16 Modbus |
| Flow control | None |
| Interface | RS-485, RS-422, or RS-232C |
| Retry function | None |
| Communications buffer | 217 bytes |
| Communications response wait time | 0 to 99 ms Default: 20 ms |

^{*}The baud rate, data bit length, stop bit length, and vertical parity can be individually set using the Communications Setting Level.

Current Transformer (Order Separately) Ratings

Heater Burnout Alarms, SSR Failure Alarms, and Heater Overcurrent Alarms

| CT input (for heater current detection) | Models with detection for single-phase heaters: One input Models with detection for single-phase or three-phase heaters: Two inputs |
|---|---|
| Maximum heater current | 50 A AC |
| Input current indication accuracy | ±5% FS ±1 digit max. |
| Heater burnout alarm setting range *1 | 0.1 to 49.9 A (in units of 0.1 A) Minimum detection ON time: 100 ms |
| SSR failure alarm setting range *2 | 0.1 to 49.9 A (in units of 0.1 A) Minimum detection OFF time: 100 ms |
| Heater overcurrent alarm setting range *3 | 0.1 to 49.9 A (in units of 0.1 A) Minimum detection ON time: 100 ms |
| | |

- *1. For heater burnout alarms, the heater current will be measured when the control output is ON, and the output assigned to the alarm 1 function will turn ON if the heater current is lower than the set value (i.e., heater burnout detection current value).
- *2. For SSR failure alarms, the heater current will be measured when the control output is OFF, and the output assigned to the alarm 1 function will turn ON if the heater current is higher than the set value (i.e., SSR failure detection current value).
- *3. For heater overcurrent alarms, the heater current will be measured when the control output is ON, and the output assigned to the alarm 1 function will turn ON if the heater current is higher than the set value (i.e., heater overcurrent detection current value).

Electrical Life Expectancy Curve for Relays (Reference Values)

External Connections

Control output 1 and control output 2 are functionally isolated from the internal circuits.

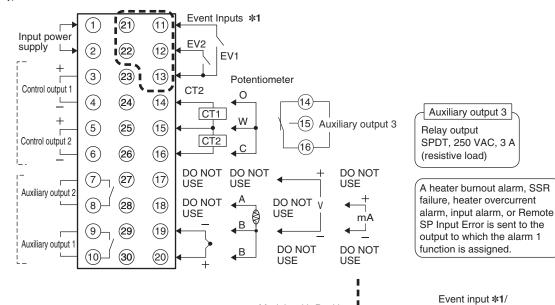

Controllers

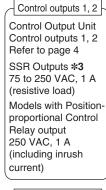

Option Units

The Temperature Controller is set for a K-type thermocouple (input type = 5) by default. An input error (5.ERR) will occur if the input type setting does not agree with the temperature sensor. Check the input type.

- sure that the surrounding temperature does not exceed the allowable operating temperature specified in the specifications.
- $\ensuremath{\bigstar} \text{Group mounting is not possible if an SSR output is used for control}$ output 1 or 2 and the E53-C3N or E53-C3DN Output Unit is used. For these combinations, maintain the following mounting space between Controllers.

Accessories (Order Separately)

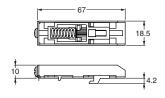

USB-Serial Conversion Cable E58-CIFQ1

Terminal Covers E53-COV16 (Six Covers provided.) 1.2 3.2

Mounting Brackets Y92H-9 (2pcs)

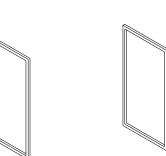

One set is packaged with the product.

Order Mounting Brackets separately if yours are lost or damaged.

Waterproof Packing

Y92S-P4 (for DIN 96 × 96)

Y92S-P5 (for DIN 48 × 96)

Order the Waterproof Packing separately if it becomes lost or damaged.

The Waterproof Packing can be used to achieve an IP66 degree of protection.

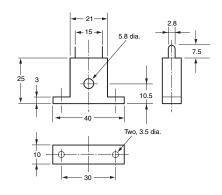

(Deterioration, shrinking, or hardening of the waterproof packing may occur depending on the operating environment. Therefore, periodic replacement is recommended to ensure the level of waterproofing specified in IP66. The time for periodic replacement depends on the operating environment. Be sure to confirm this point at your site. Consider one year a rough standard. OMRON shall not be liable for the level of water resistance if the customer does not perform periodic replacement.)

The Waterproof Packing does not need to be attached if a waterproof structure is not required.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE

PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warrantv.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions. Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

2021.10

In the interest of product improvement, specifications are subject to change without notice.
