

# Quectel LC29H Series

## Dual-Band Multi-Constellation GNSS Module with RTK and DR Functions

LC29H is a series of dual-band, multi-constellation GNSS modules that support the concurrent reception of all four global GNSS constellations: GPS, BDS, Galileo and GLONASS.

Compared to GNSS modules that track only L1 signals, the LC29H series can receive and track a higher number of visible satellites in multi bands, thereby significantly mitigating the multipath effect in deep urban canyons and improving positioning accuracy. By having an internal LNA and SAW filter, the module achieves better sensitivity and anti-interference capability. Featuring dual frequency support, the module delivers CEP accuracy values of 1 m in autonomous mode and centimeter levels in the RTK capable variants. The optional DR function ensures the module's superior positioning performance even in weak signal areas or when GNSS signals are not available.

Based on the receiver chip using 12 nm technology, the LC29H series provides advanced power management enabling low-power GNSS sensing and position fix, which makes the module an ideal solution for power-sensitive and battery-powered systems.

Featuring high-precision positioning and low power consumption makes the LC29H series perfectly suited for applications such as real time tracking and sharing economy related services.

## Key Features

- ✓ Multi-GNSS engine for GPS, GLONASS, BDS, Galileo and QZSS
- ✓ Reception of L1 and L5 GNSS bands signals concurrently
- ✓ Integrated DR function (optional)
- ✓ RTK (optional) providing sub-meter accuracy with fast convergence time and outstanding performance
- ✓ Integrated LNA for high sensitivity
- ✓ Integrated SAW filter for noise cancellation
- ✓ UART, I2C and SPI\* interfaces
- ✓ Integrated AGNSS function
- ✓ Integrated AIC and jamming function

AGNSS Technology

Ultra Low Power Consumption

Ultra Compact Size

Tracking Sensitivity: -165 dBm

Operating Temperature Range: -40 to +85 °C

Anti-jamming

RoHS Compliant

Multi-constellation System

**NOTE:**

- ①: CEP, 50 %, 24 hours static, -130 dBm, more than 6 SVs.
- ②: CEP, 50 %, with active high-precision antennas in an open-sky environment and within 1 km from the base station.
- ③: Room temperature, all satellites at -130 dBm.
- ④: Open-sky, active high-precision antennas; less than 1 km baseline length is also required for LC29H (BA, DA, EA\*).
- ⑤: ITAR limits.
- \*: Under development/ ongoing.
