

To: Embedded Business Unit Z41C and Z42B Customers

January 30, 2025

Subject: PCN 35751 MICRON_End of Life of DRAM DDR4 Compute Segment (Z41C, Z42B)
Components and Modules

To Whom It May Concern,

Recently Micron's Compute Segment sent out a Product Change Notification (PCN) notifying their customers of the end of life of DRAM DDR4 (Z41C and Z42B). This PCN was intended solely for compute and data center customers.

For our other customers we will continue to support Z41C and Z42B component and modules. The Embedded Business Unit roadmaps have not changed. To further clarify our support of Z41C and Z42B, below is the part list we will continue to support.

The Embedded Business Unit bases their end of life on market conditions. At this point we have no plans to end of life these products.

If you have any questions or concerns, please contact your Micron Account Manager or bkolbl@micron.com.

Best Regards,

Barbara Kolbl
