

Other Equipment

Updated 2023-08-14 | ⌚ 1 minute(s) read # PXIe-4147 # Getting Started

There are several required items not included in your PXIe-4147 kit that you need to operate the PXIe-4147. Your application may require additional items not included in your kit to install or operate your PXIe-4147.

Required Items

- A PXI Chassis and chassis documentation
- A PXI Controller or PC with a Device for PXI Remote Control system that meets the system requirements specified in this guide and chassis documentation

Optional Items

- PXI Slot Blocker Kit (NI part number 199198-01)
- SHDB25F-DB25F-LL, 25-pin D-SUB Low Leakage Cable for SMU
 - 1 m (NI part number 132893-01)
 - 2 m (NI part number 132893-02)

Notice

The PXIe-4147 provides higher maximum current and more precise current measurement capabilities than earlier PXIe-414x modules. Consequently, PXIe-4147 performance can be compromised by the accessories associated with those modules. The following accessories are not recommended for use with the PXIe-4147.

- DB25F-DB25F, 25-pin D-SUB Low Leakage Cable for SMU
 - 1 m (NI part number 782015-01)
 - 2 m (NI part number 782015-02)
- Screw Terminal Connector Kit for PXIe-414x SMUs (NI part number 781974-01)

Visit ni.com for more information about these additional items.
