

Customer Information Notification

202504009I : Freescale Logo to NXP Logo Product Marking Conversion for All Remaining Former Freescale Products

Note: This notice is NXP Company Proprietary.

Issue Date: Apr 16, 2025 **Effective Date:** May 26, 2025

Here is your personalized communication about an NXP notification. For detailed information we invite you to view this notification online

Management summary

Previously, NXP Semiconductors announced with General Notification 202502001G (16-Feb-2025) the Freescale logo to NXP logo product marking conversion for all former Freescale products not previously converted.

Now for customer convenience, NXP Semiconductors provides a follow-up series of Customer Information Notifications (CINs) to relay to customers their impacted products. Note that due to the extensive product list, your organization may indeed receive multiple CIN notifications to encompass your impacted products.

Notification Overview

Description

Previously, NXP Semiconductors announced with General Notification 202502001G (16-Feb-2025) the Freescale logo to NXP logo product marking conversion for all former Freescale products not previously converted.

Now, for customer convenience, NXP Semiconductors provides a follow-up series of Customer Information Notifications (CINs) to relay to customers their impacted products. Note that due to the extensive product list, your organization may indeed receive multiple CIN notifications to encompass your impacted products.

Original General Notification 202502001G (16-Feb-2025):

NXP Semiconductors announces the Freescale logo to NXP logo product marking conversion for all former Freescale products not previously converted. This NXP marking initiative achieves unified NXP branding for the entire portfolio.

The anticipated timeline for this Freescale logo to NXP logo product marking conversion aligns with product date code / trace code beginning work week (ww) 22 2025 (last week May 2025), with a ramped implementation over subsequent weeks until all product marking conversion is completed, anticipated ww27 2025, with minimal exceptions. With the standard NXP lot combination practices, which seek to avoid excessive product scrappage, customers may indeed receive product with mixed Freescale and NXP logo markings within shipment trays, tubes, or reels.

This General Notification 202502001G is issued well in advance of the NXP logo conversion implementation date to ensure no customer manufacturing disruptions occur with potential Automated Optical Inspections (AOI), etc. Except for visible Freescale logo to NXP logo change, absolutely no other changes; no change to orderable part numbers, no impact on product form, fit, function, quality, or reliability compared to the product currently received by customers.

Please see the attachment for change details, including representative before and after product logo photos. Note, these are simply representative package types / photos and not intended to capture all package / part instances.

NXP strongly advises that this General Notification and its associated example logo photos be relayed to your site's AOI owners / experts to review your systems and take precautions to avoid manufacturing line disruptions. Although from NXP side we expect the logo to not be part of any potential customer AOI inspection area, only your experts will be able to judge any potential impact. NXP greatly appreciates your cooperation to review and complete this important action item at your earliest opportunity.

Reason

This NXP marking initiative achieves unified NXP branding for the entire portfolio. Customer Information Notification to relay to customers their impacted products.

Identification of Affected Products

Top side product marking changes from Freescale logo to NXP logo - absolutely no other changes.

Anticipated Impact on Form, Fit, Function, Reliability or Quality

No Impact on form, fit, function, reliability or quality

Disposition of Old Products

Existing inventory will be shipped until depleted

About NXP Semiconductors

NXP Semiconductors N.V. (NASDAQ: NXPI) provides High Performance Mixed Signal and Standard Product solutions that leverage its leading RF, Analog, Power Management, Interface, Security and Digital Processing expertise. These innovations are used in a wide range of automotive, identification, wireless infrastructure, lighting, industrial, mobile, consumer and computing applications.
