USB micro B Cable with LEDs – Blue and Green – 1 meter
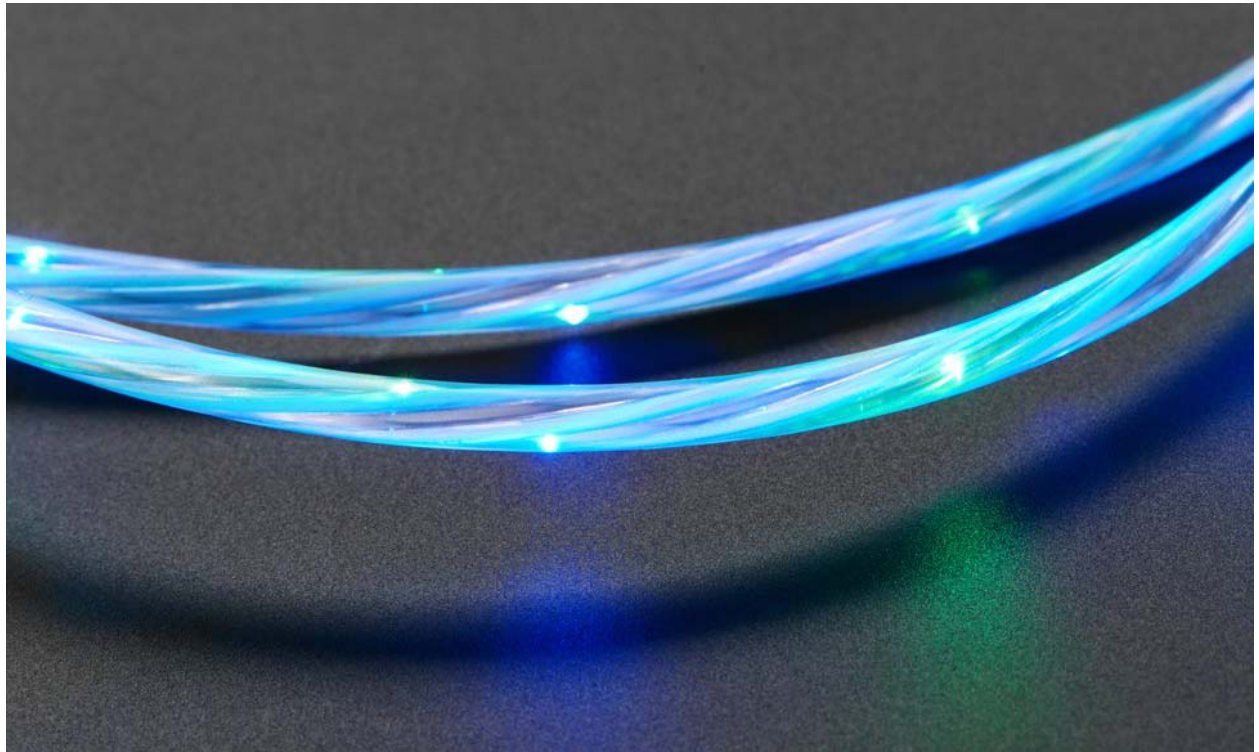

PRODUCT ID: 4009

At first glance this appears to be an ordinary A to micro B USB cable. Plug it in to your device and power supply, and you get a colorful glitter of dozens of little LEDs embedded in the length of the cable.

Can be used for data and charging.

The LEDs are luminous but not *too* bright. Perfect for vampire makers, candy ravers, or maybe night owls who misplace their devices in the thick of night!

TECHNICAL DETAILS

- Cable length: 1 meter
- Current max: 2.1A
- Cable diameter: 3mm
