

PSOC™ 4000T Multi-Sense Prototyping Kit

Evaluate and develop superior capacitive, inductive and liquid sensing solutions

The CY8CPROTO-040T-MS PSOC™ 4000T Multi-Sense Prototyping Kit is a development platform designed to facilitate the evaluation of Infineon's Multi-Sense technologies. The kit offers a complete, out-of-the-box experience, allowing users to explore and assess the capabilities of various sensing technologies, including, capacitive sensing, inductive sensing, and liquid level sensing.

Developers can leverage the CY8CPROTO-040T-MS PSOC™ 4000T Multi-Sense Prototyping Kit to create their own custom sensing applications, tailored to specific use cases and requirements. The kit supports the development of applications utilizing capacitive sensing, inductive sensing, and liquid level sensing technologies. One notable example of a customized capacitive sensing application is hover touch. This innovative technology enables users to interact with devices without physically touching the sensor overlay.

The CY8CPROTO-040T-MS kit comprises a control board and multiple expansion boards. The expansion boards include two Touch-over-Metal boards, a liquid level sensing flexible printed circuit board (FPC) with a container, and a multi-button CAPSENSE™ hover touch board.

The PSOC™ 4000T's fifth-generation CAPSENSE™ technology and Multi-Sense capabilities make it an ideal choice for applications that require advanced sensing, low power consumption, and high performance. Its versatility and flexibility enable developers to create innovative solutions for a wide range of applications such as, home appliances, countertop appliances, wearables, hearables, and other consumer electronics applications.

The CY8CPROTO-040T-MS PSOC™ 4000T Multi-Sense Prototyping Kit makes full use of Infineon's ModusToolbox™ software, simplifying sensing design, with its comprehensive collection of multi-platform tools and software libraries, including board support packages (BSPs), peripheral driver library (PDL), and middleware such as CAPSENSE™.

Kit contents

- PSOC™ 4000T Multi-Sense control board
- Inductive keypad - 4 expansion board
- Inductive keypad - 2 expansion board
- Liquid level sensor expansion board
- Plastic container for liquid level sensing demonstration
- USB-A to USB-C cable
- Quick start guide

Key benefits

- Complete out-of-the-box experience
- Ease of use with ModusToolbox™ support
- Code examples showcasing HMI capabilities
- Multi-sensing capability evaluation
- Contactless liquid level sensing
- High resolution liquid level sensing
- Touch interface for metal overlay
- CAPSENSE™ hover touch to support capacitive sensing with airgap

PSOC 4000T Multi-Sense control board

CAPSENSE™ hover touch board

Inductive daughter boards

Liquid sensing flex board

PRODUCT BRIEF

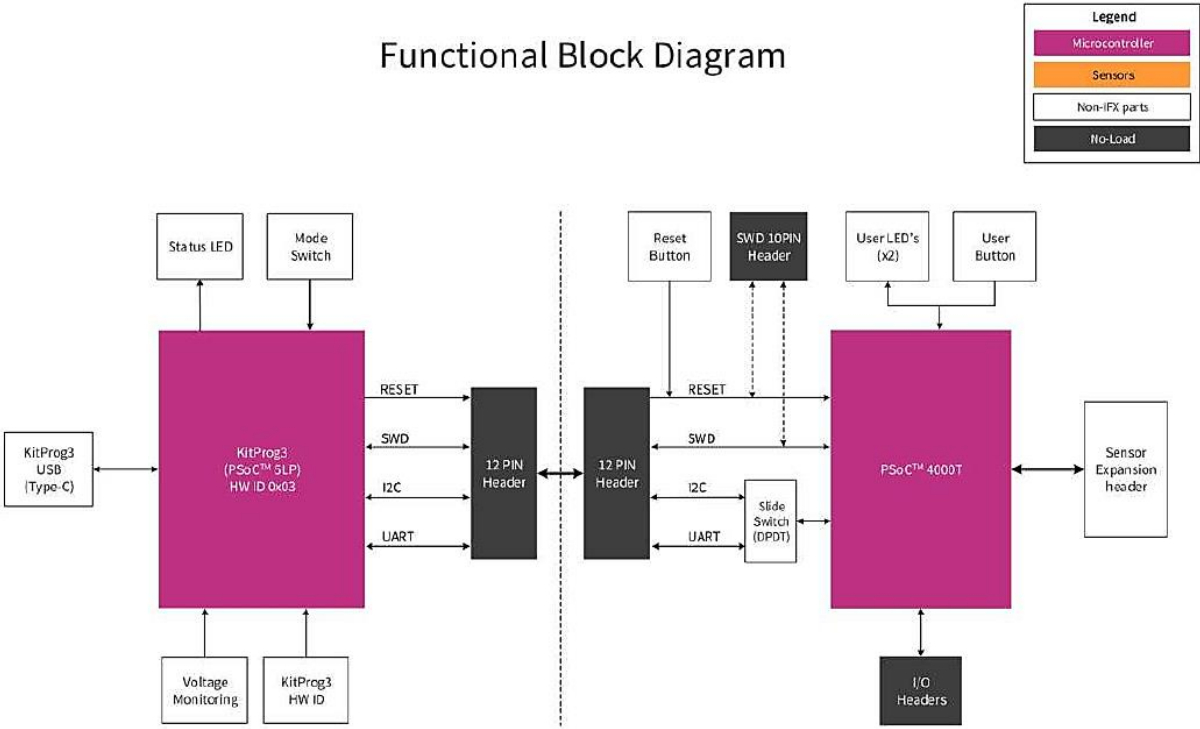

Key Applications

Wearables Hearable	Wear Detection, Touchscreen, Slider, TP-Gestures
Smart Home Appliance	Proximity Wakeup (Backlight), Capacitive Keypad, hover touch, inductive touch, Slider, Trackpad
Other consumer Industrial	Proximity Wakeup (Backlight), Touchscreen, Capacitive Keypad, Slider, Trackpad, Liquid Level Sense

Ordering Part Numbers

PN	CPU Core	Max CPU Speed	CAPSENSE™	Inductive	TCPWM Blocks	SCB Blocks	GPIO	Package
CY8CPROTO-040T-MS	Arm® Cortex®-M0+	48 MHz	1	1	2	2	19	Kit
