33302

Belden

The 333 series of braidless Silicone 1500ΩC lead wire features easy and clean stripping without the problems associated with glass braid wire. It has excellent physical and mechanical strength properties.

Part Number	Weight	Min. Quantity
33302	N-A	N-A

33304

Belden

The 333 series of braidless Silicone 1500ΩC lead wire features easy and clean stripping without the problems associated with glass braid wire. It has excellent physical and mechanical strength properties.

Part Number	Weight	Min. Quantity
33304	N-A	N-A

33306

Belden

The 333 series of braidless Silicone 1500ΩC lead wire features easy and clean stripping without the problems associated with glass braid wire. It has excellent physical and mechanical strength properties.

Part Number	Weight	Min. Quantity
33306	N-A	N-A

33308

Belden

The 333 series of braidless Silicone 1500ΩC lead wire features easy and clean stripping without the problems associated with glass braid wire. It has excellent physical and mechanical strength properties.

Part Number	Weight	Min. Quantity
33308	N-A	N-A

33310

Belden

The 333 series of braidless Silicone 1500ΩC lead wire features easy and clean stripping without the problems associated with glass braid wire. It has excellent physical and mechanical strength properties.

Part Number	Weight	Min. Quantity
33310	N-A	N-A

33312

Belden

The 333 series of braidless Silicone 1500ΩC lead wire features easy and clean stripping without the problems associated with glass braid wire. It has excellent physical and mechanical strength properties.

Part Number	Weight	Min. Quantity
33312	N-A	N-A

33314

Belden

The 333 series of braidless Silicone 1500ΩC lead wire features easy and clean stripping without the problems associated with glass braid wire. It has excellent physical and mechanical strength properties.

Part Number	Weight	Min. Quantity
33314	N-A	N-A

33316

Belden

The 333 series of braidless Silicone 1500ΩC lead wire features easy and clean stripping without the problems associated with glass braid wire. It has excellent physical and mechanical strength properties.

Part Number	Weight	Min. Quantity
33316	N-A	N-A

33318

Belden

The 333 series of braidless Silicone 1500ΩC lead wire features easy and clean stripping without the problems associated with glass braid wire. It has excellent physical and mechanical strength properties.

Part Number	Weight	Min. Quantity
33318	N-A	N-A

33320

Belden

The 333 series of braidless Silicone 1500Ω lead wire features easy and clean stripping without the problems associated with glass braid wire. It has excellent physical and mechanical strength properties.

Part Number	Weight	Min. Quantity
33320	N-A	N-A

33322

Belden

The 333 series of braidless Silicone 1500Ω lead wire features easy and clean stripping without the problems associated with glass braid wire. It has excellent physical and mechanical strength properties.

Part Number	Weight	Min. Quantity
33322	N-A	N-A

33390

Belden

The 333 series of braidless Silicone 1500Ω lead wire features easy and clean stripping without the problems associated with glass braid wire. It has excellent physical and mechanical strength properties.

Part Number	Weight	Min. Quantity
33390	N-A	N-A

35606

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance. The 356-series of XL-DUR is recommended for class 130(B) as motor leads

Part Number	Weight	Min. Quantity
35606	N-A	N-A

35608

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance. The 356-series of XL-DUR is recommended for class 130(B) as motor leads

Part Number	Weight	Min. Quantity
35608	N-A	N-A

35610

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance. The 356-series of XL-DUR is recommended for class 130(B) as motor leads

Part Number	Weight	Min. Quantity
35610	N-A	N-A

35612

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance. The 356-series of XL-DUR is recommended for class 130(B) as motor leads

Part Number	Weight	Min. Quantity
35612	N-A	N-A

35614

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance. The 356-series of XL-DUR is recommended for class 130(B) as motor leads

Part Number	Weight	Min. Quantity
35614	N-A	N-A

35616

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance. The 356-series of XL-DUR is recommended for class 130(B) as motor leads

Part Number	Weight	Min. Quantity
35616	N-A	N-A

35618

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance. The 356-series of XL-DUR is recommended for class 130(B) as motor leads

Part Number	Weight	Min. Quantity
35618	N-A	N-A

35620 – 35620

35620

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance. The 356-series of XL-DUR is recommended for class 130(B) as motor leads

Part Number	Weight	Min. Quantity
35620	N-A	N-A

35622

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance. The 356-series of XL-DUR is recommended for class 130(B) as motor leads.

Part Number	Weight	Min. Quantity
35622	N-A	N-A

35716

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance.

Part Number	Weight	Min. Quantity
35716	N-A	N-A

35718

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance.

Part Number	Weight	Min. Quantity
35718	N-A	N-A

35720

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance.

Part Number	Weight	Min. Quantity
35720	N-A	N-A

35722

Belden

The insulation is cross-linked polyethylene applied in a single extrusion. This construction has excellent thermal aging characteristics; moisture resistance; and solvent resistance.
