

SKU: 5088

Description

These solid 2.0mm pitch connector cable pairs are great when you need something that can carry a couple of amps of current and are easy to connect and disconnect.

These cables are nice and long, 20 cm each, in fact. They've got both small form factor and are a matching set, with an inline socket and plug connector. The two friction lock to make easy-breezy connections whenever you need light and small connectivity.

The two cables match with each other and with any JST PH compatible connectors. Wires are stranded 26 AWG.

Technical Details

- Length: single cable approx 20cm. 40cm altogether when cables are connected.
- Connector Pitch: 2.0mm
