Cooling Systems Division

Notification of additional balance weight material for fans

We have been informed by our supplier that a balance weight material that used to correct the balance of a blade and rotor unit in our manufacturing process contains Chinese-made rare earth (tungsten). This material has become difficult to obtain due to recent export restrictions by the Chinese government. We expect our production to be affected as early as September. We'll continue to make efforts to secure the current balance weight material. In addition to that, we have decided to adopt the following alternative materials to maintain stable production.

1. Affected Products

BLDC fans and ACDC fans

(Please refer Appendix for Affected Products List)

2. Additional balance weight material

	Current material	Additional material
Manufacturer	Tohri Laboratory Inc.	SOMAR CORPORATION
Color	Dark brown	Black
Example of usage		

*For manufacturing, we use one of the above balance weights depending on availability.

The use of additional materials does not affect the product's characteristics, reliability, or environmentally regulated substances.

(Reliability tests for the additional materials have been completed.)

3. Effective date of change

We plan to gradually introduce the additional material starting in September 2025. The actual application will depend on the availability of both current and additional materials.

We sincerely apologize for the short notice. We will do our best to ensure that this doesn't affect delivery of our products to your company. Your understanding and cooperation on this matter are greatly appreciated.

Best Regards,
