

## Back to Back Hook and Loop Cable Management

IB2B1200

### General Description

TapeCase Back to Back Hook and Loop Cable Management is a low-profile, non-adhesive bundling fastener that wraps around and attaches to itself. This product is constructed with molded hooks on one side and knit loops on the opposite side. Press together to fasten and pull apart by hand to disengage. The bundling fastener is suitable for homes, offices, data centers, AV and security, and more.

### Product Information
