- Multiple Temperature Presets

- Feeds Filament While Drying

- Fits Two 8" OD Spools

- Double-Wall Structure

- Spool Adapters Included

- Easy to Read Digital Display

- Built-In Shutoff Timer

- ETL Certified

- # LulzBot KT-MS0100 Overview

- *Keep your filament free from moisture with the **LulzBot PrintDry PRO3 Filament Dryer**. Designed to hold two 8" OD spools, the PrintDry automatically ensures your material is ready to be used at a moment's notice, essential for seasoned printers and areas that experience frequent environmental changes.*
- The double-walled structure of the PrintDry keeps the internal filament safe, giving you the ability to control the moisture level with five temperature presets ranging from 95 to 167°F. Dedicated holes allows you to feed the filament directly from the PrintDry to your 3D printer, keeping your material ready for your printing process. An easy-to-read digital display helps with adjusting your settings such as the temperature range and the built-in shutoff timer which can be set with a max time of 48 hours, ideal for long and complicated projects. Included spool adapters allow you to fit a wide range of filaments within the housing. The PrintDry is ETL certified, ensuring it meets the proof of product compliance and meets industry standards.
