

***Meet Every Mission-Critical Challenge with Confidence***

**Meet our EMI Engineering Lab Kit! This kit is designed to help with your shielding needs by offering an array of Orbel's Board Level Shielding products.**

EMI Engineering Lab Kit: 80KIT002

## EMI Engineering Lab Kit

From pre-set sizes right out of our catalog, to modular bend-it-yourself shielding solutions, this kit has it all. In addition to the different shield families, we've also included access to an instruction guide, videos, drawings, literature and more!

As shields are used, finding replacements will be a breeze. See your distributors website for all replacements. This kit is a must-have item for those who perform in-house testing & evaluation of localized PCB shielding. Orbel is pleased to offer it through our authorized distributors.
