USB Type C PD to 5.5mm/2.1mm Barrel Jack Adapter - 12V

Product ID: 6032

• • • • •

Description

This convenient adapter lets you plug a [USB Type C 3.1 5V cable](#) into something with a 5.5mm / 2.1mm DC barrel socket.

Works great with **any** device or cable with 5.5mm / 2.1mm DC barrel socket. Since USB C is reversible you can flip it for a left angle or right angle. You'll get 12V DC output, at up to 3A (or whatever the power adapter can do)

Please note: If your USB PD power supply does not explicitly have 12V out, this cable will provide 5V or some other lower voltage. Also, this adapter is center positive, the most common configuration. If you need center negative, please use one of our [5.5mm/2.1mm DC Barrel Polarity Reversing Cable Adapters](#) and plug it onto the end.
