Component Change Notice

Dear all

Best wishes and thank you for your continuous support.

We are writing to inform you that we are planning to change the plating and material of the slide switches supplied to you as follows.

Best regards

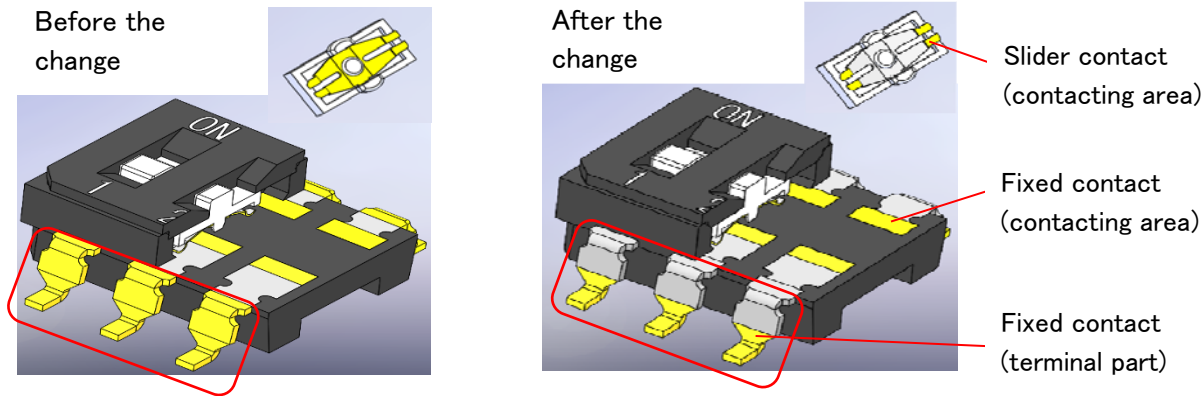

1. Influenced products

Dip slide switch: CFS series, CFP series.

2. Details

Component name	Details	Before the change	After the change
Slider contact	Au plating area	The whole contacting side	Contacting area only
Fixed contact	Au plating area	Faces of both sides	Contacting area and soldering area only
	Metal material	Copper alloy (phosphor bronze)	Copper alloy (brass)

※Product part number and specifications remain unchanged.

※ The drawing is for CFS series. The CFP series share the same contact structure with CFS series. The slider contact and fixed contact will change at the same time.

3. Reason for the change

To compensate the influence from the continued surge in Au and raw material price on the products.

4. Time to change

Estimated to supply the changed products sequentially from October 2024 onwards.

Depending on the order-receiving situation, production status, stocking state, etc. the products before and after change may coexist and be delivered at the same time. Moreover, due to the same reason, please be noted that the products before the change may still be delivered to you even if the

NIDEC COMPONENTS CORP.

products after the change have already been delivered.

For the above reasons and because it is a product sold to an unspecified number of customers, please note that we cannot mark out the first articles as you may request.

Due to the sharp rise in Au price and the top priority of continuous product supply to our customers, please help understand that we will change the specifications in a short period of 4 months from date of this notice.

5. Product identification

The part marked out in the red box of the drawing above: appearance color of the terminal part of the fixed contacts differs.

6. Performance evaluation

Please refer to the attached comparison test report of the products before and after the change for details.

7. Request

Please contact us as soon as possible if there are any authentication procedures, etc. from your company.

Please approve and sign back to us before the end of August.

It would be deemed as acceptance if there is no reply.
